Concept Note

Context

Cutting edge issues in EDUCATION focus on the detailed study in an area, especially to discover something new. Cutting edge concepts talk about the burning issues in education. It means the most recent and advanced stage of development in an academic arena and most particularly in the field of educational research. In education cutting age issues are the development of newest systems, discovery of new equipment and exploration of new resources in the field of education. It also deals with new challenges faced in different spheres of education.

There are many epoch-making changes that have already been introduced in education. Further research can lead to the solution of present problems and can give us new lights regarding the present issues and challenges. Such initiatives are expected to bring about modification of existing knowledge, attitudes, and skills. For instance, the traditional methods of instruction gives way to modern psychological concepts; face-to-face classroom based instruction has been modified by technological advancements. Cutting edge issues in education deal with different aspects and issues of academic and professional development like digital literacy and culture, professional development for teachers using ICT, efficiency in a resource-constrained environment, cost, equity, and sustainability. It is the responsibility of the academicians, researchers to think on the cutting edge issues in different domains like technological advancements, educational management, curriculum development, artificial intelligence and many more. Research can lead to more creative, innovative and path-breaking developments that can push the margins into new horizons.
